

Hi everyone!

My name is Ahmetov Ruslan. I come from Turkmenistan (Lebapa). I study at Mogilev State A. Kuleshov University. I have chosen the faculty of foreign languages. My major - theoretical and applied linguistics. This is my first time in Belarus, and I am very excited about these new adventures and opportunities.

I have chosen this faculty because I am very interested in languages and how they function. At school I started learning English and Russian, and to my surprise, I realized that I particularly like studying the structure of a language, its grammar, pronunciation and usage patterns in different countries. I would like to understand how languages are interconnected and how this knowledge can be used in the future, for example, in translation or teaching. Therefore, my decision to choose a major “Theoretical and applied linguistics” was obvious. It helps me expand my knowledge of languages and develop skills that will be useful in an international career.

I also have chosen Mogilev State A. Kuleshov University because I have heard a lot of good reviews about this university. This university is famous for its high teaching standards, good atmosphere and opportunities for international students. I liked the fact that there are modern academic buildings, comfortable classrooms and many opportunities for the development of both science and culture. In addition, the teachers are very friendly and professional, they are always ready to help and give advice. I feel at home here, and this is very important to me, because being far from my homeland I need to feel support and care.

I also like studying in Belarus. Here I can meet wonderful people from different countries, make new friends, and begin to better understand Belarusian culture and traditions. Belarus is a beautiful country with a rich history and picturesque nature. I especially like the local parks, old buildings and cozy cafes.

There are very friendly people here, they are always ready to help, and I myself began to gain a lot of new experiences and knowledge.

I also enjoy studying at such a prestigious faculty, where a lot of attention is paid to practice and application of knowledge. During this time, I have already participated in several scientific conferences and cultural events organized by the university. It helps me to understand languages better and use them in real life.

I hope that my studies here will open up many new opportunities for me and help me realize my dreams of an international career in linguistics.

I definitely plan to continue my studies and share my knowledge and experience in the future, as well as help other students who also come to another country for education. Belarus has become a second homeland for me, and I am sure that I have many interesting and important events ahead of me.

Thanks for your attention!
